SUBJECT INDEX

Androgen(s)
  immunocytochemical detection of, in human temporal cortex, 197
  inhibition by, of the proliferation of a variant of the human prostate cancer cell line LNCaP, 67
  receptor(s)
    expression of, revealed by a ribonuclease protection assay in Cynomolgous monkey, 35
Antiestrogen(s)
  SKOV3 ovarian carcinoma cells are growth-resistant to, 279
  estrogen receptor blockade by the pure, ZM 182780 induces death of pituitary tumour cells, 327
Aromatase
  analysis of the expression and the first exon of, mRNA in monkey brain, 17
Aromatase inhibitor(s)
  blockade of estrogen synthesis with, in pseudopregnant rat, 347
  measurement of plasma estrone sulphate in patients treated with, 409

Brain
  analysis of the expression and the first exon of aromatase mRNA in monkey, 17
Breast cancer
  effect of droloxifene (3-hydroxytamoxifen) on plasma gonadotrophins, sex hormone binding globulin and estrogen levels in postmenopausal patients with, 193
  pharmacokinetics of tamoxifen in premenopausal and postmenopausal women with, 229

Calbindin-D
  contrasting effects of tamoxifen and ICI 182780 on estrogen-induced, 9K gene expression in the uterus and in primary culture of myometrial cells, 1
Cytochrome *P*450-CYP27
  -catalyzed oxidation of C-27 steroid into C-27 acid, 115
Cytokines
  cytotoxic actions of, on cultured mouse luteal cells are independent of nitric oxide, 291

Dexamethasone
  attenuates the estradiol-induced increase of IGF-I mRNA in rat uterus, 9
  time-dependent effects of, on glutamate binding, ornithine decarboxylase activity and polyamine levels in the transected spinal cord, 85
1,25-Dihydroxyvitamin D_3-analogs
  effects of, on osteoblast-like cells and on *in vitro* bone resorption, 337
DNA
  a putative step in steroid hormone action involves insertion of steroid ligands into, facilitated by receptor proteins, 173

Endometrial Ishikawa cells
  lack of estrogenic potential of progesterone- or 19-nor-progesterone-derived progestins as opposed to testosterone- or 19-nor-testosterone derivatives on, 77
Epitestosterone
  plasma levels of, from puberty to adult life, 405
Equilin sulfate
  metabolism of, in the dog, 271
Estradiol
  in specific regions of the human female brain in different endocrine states, 297
Estrogen(s)
  identification of, regulated genes in Fe33 rat hepatoma cells, 363
  receptor(s)
    phosphorylation of the human, by mitogen-activated protein kinase and casein kinase II, 163
  SKOV3 ovarian carcinoma cells have functional estrogen receptor but are growth-resistant to, 279

Estrogen sulfotransferase
induction of hepatic, expression by hypophysectomy in female rats, 255
Estrone-3-glucuronide
measurement of, in urine by non-competitive idiometric assay, 107
Estrone sulfate
measurement of plasma, in patients on treatment with aromatase inhibitors, 409

FSH
receptor(s)
in the Cynomolgous monkey (*Macaca fascicularis*), 35

Gene(s)
characterization of the promoter of the, for a mouse *vas deferens* protein related to the aldo-keto reductase superfamily, 315
identification of a splice variant of the rat and human mineralocorticoid receptor, 159
identification of estrogen regulated, in Fe33 rat hepatoma cells, 363
structure-function relationships and molecular genetics of the 3β-hydroxysteroid dehydrogenase, family, 489
Gene expression
of estrogen-induced calbindin-D 9K, effects of tamoxifen and ICI 182780 in the uterus and in primary culture of myometrial cells, 1
of IGF-I in the rat uterus, 9
Glucocorticoid(s)
action of, on synaptic plasma membranes, 185
enhance the cholesterol side-chain cleavage activity of ovine adrenocortical mitochondria, 57
receptor(s)
immunocytochemical analysis of hormone mediated nuclear translocation of wild type and mutant, 135
mRNA levels in the DIID/K12/Prob rat colonic adrenocarcinoma cell line, 219
the mitochondrion as a primary site of action of, 43
Glucuronosyltransferase
activity in the human cancer cell line LNCaP, 355

c-*Ha-ras*
estrogen induced, expression via activation of tyrosine kinase in uterine endometrial fibroblasts and cancer cells, 25
6-Hydroxycortisol
urinary excretion of, in women during treatment with different oral contraceptive formulations, 129
3α-Hydroxysteroid dehydrogenase
cloning, sequencing and expression of *Pseudomonas testosteroni* gene encoding, 233
3β-Hydroxysteroid dehydrogenase
expression and regulation of, in the hamster, 481
organisation of, and cytochrome *P*450scc into a catalytically active molecular complex in bovine adrenocortical mitochondria, 507
structure–function relationships and molecular genetics of the, gene family, 489
11β-Hydroxysteroid dehydrogenase
analysis of the human gene encoding the kidney isozyme of, 473
human, type II enzyme in various species, 457
placental, and the programming of hypertension, 447
structures important in mammalian, 589
type II, in human foetal and adult life, 465
11β-Hydroxysteroid dehydrogenase 1 transcript
identification and tissue distribution of a novel variant of, 247
17β-Hydroxysteroid dehydrogenase
activity in endometrial cancer cells, 573
characteristics of human types 1, 2 and 3, activities, 581
expression and regulation of, type 4 in human THP 1 leukemia cells, 555
intrinsic sterol- and phosphatidylcholine transfer activites, of, type IV, 549
molecular characterization of mouse, type IV, 541
molecular genetics of androgenic, 533

multiple forms of, 515
porcine, and its induction by progesterone, 535
role and proposed mechanism by which estradiol, regulates breast tumor estrogen concentrations, 565
role of, type 1 in endocrine and intracrine estradiol biosynthesis, 525
structures important in mammalian, 589
subcellular localization of, type 4 and its interaction with actin, 617
Hypertension
placental 11β-hydroxysteroid dehydrogenase and the programming of, 447

Insulin Growth Factor-I
dexamethasone attenuates the estradiol-induced increase of, mRNA in the rat uterus, 9

Kidney
analysis of the human gene encoding the, isozyme of 11β-hydroxysteroid dehydrogenase, 473

LNCaP cells
specificity of glucuronosyltransferase activity in the human, cancer cell line, 355

MCF-7 breast cancer cells
effects of two classes of progestagens, pregnane and 19-nortestosterone derivatives on growth of, 423
Mineralocorticoid(s)
receptor(s)
identification of a splice variant of the rat and human, genes, 159

Nitric oxide
cytotoxic actions of cytokines on cultured mouse luteal cells are independent of, 291
Nomegestrol acetate
a clinically useful 19-norprogesterone derivative which lacks estrogenic activity, 239

Oral contraceptives
urinary excretion of 6β-hydroxycortisol in women during treatment with different, 129

Phosphorylation
identification of, sites in the mouse estrogen receptor, 305
Pituitary tumor cells
estrogen receptor blockade by the pure antiestrogen ZM 182780 induces death of, 327
Progestrone
dual regulation of luteal, production by androstenedione during spontaneous and RU486-induced luteolysis in pregnant rats, 385
receptor(s)
reptilian (*Chrysemys picta*) hepatic, and their relationship to plasma steroids and the vitellogenic cycle, 93
Prostate cancer
androgens inhibit the proliferation of a variant of the human, cell line LNCaP, 67
Prostate epithelial cells
testosterone metabolism in primary cultures of human, 375

Receptor(s)
androgen(s)
expression of, in the Cynomologous monkey, 35
immunocytochemical detection of, in human temporal cortex, 197
estrogen(s)
blockade of, by the pure antiestrogen ZM 182780 induces death of pituitary tumor cells, 327
identification of phosphorylation sites in the mouse, 305
phosphorylation of the human, by mitogen-activated protein kinase and casein kinase II, 163
tissue-dependent expression of a novel splice variant of human, 413
FSH
testis-specific expression, in the Cynomolgous monkey, 35

glucocorticoid(s)
immunocytochemical analysis of hormone mediated nuclear translocation of wild type and mutant, 135
potential mechanisms underlying autoregulation of, mRNA levels in the DHD/K12/PROb rat colonic adenocarcinoma cell line, 219
mineralocorticoid(s)
identification of a splice variant of rat and human, genes, 159
sex steroid(s)
amplification, sequence and expression analysis of reptilian, 261
mRNA
IGF-I, in the rat uterus, 9
aromatase, in the monkey brain, 17
induction of hepatic estrogen sulfotransferase, in female rats, 255
potential mechanisms underlying autoregulation of glucocorticoid receptor, levels in the DHD/K12/PROb rat colonic adenocarcinoma cell line, 219
RU-486
dual regulation of luteal progesterone production by androstenedione during luteolysis induced by, in pregnant rats, 385

Sex hormone binding globulin
hepatic expression of, associated with the postnatal surge of serum androgen-binding activity in the Djungarian hamster, 147
SKOV3 ovarian carcinoma cells
have functional estrogen receptor but are growth-resistant to estrogen and antiestrogens, 279
Steroid hormone(s)
a putative step in, action involves insertion of steroid ligands into DNA facilitated by receptor proteins, 173
effect of, on the characterization of the promoter of the gene for a mouse 315
vas deferens protein related to the aldo-keto reductase superfamily, 315
role of microfilaments and intermediate filaments in the regulation of, synthesis, 601
Steroidogenesis
mitochondrial specificity of the early steps in, 607
Sulfamates
of various estrogens are prodrugs with increased systemic and reduced hepatic estrogenicity at oral application, 395

Tamoxifen
pharmacokinetics of, in premenopausal and postmenopausal women with breast cancer, 229
Testosterone
in specific regions of the human female brain in different endocrine states, 297
metabolism of, in primary cultures of human prostate epithelial cells and fibroblasts, 375
serum and urinary markers of exogenous, administration, 121
T-47D breast cancer cells
effects of two classes of progestagens on growth of, 439
Tyrosine kinase
induction of c-*Ha-ras* expression by estrogen via activation of, in uterine endometrial fibroblasts and cancer cells, 25

Uterus
dexamethasone attenuates the estradiol-induced increase of IGF-I mRNA in the, of rat, 9
estrogen-induced calbindin-D 9K gene expression in, 1

1,25$(OH)_2$ Vitamin D
increased responsiveness to sex steroids in skeletal-derived cells by pretreatment with, 211

24,25(OH)$_2$ Vitamin D
increased responsiveness to sex steroids in skeletal-derived cells by pretreatment with, 211

We would like to express our deep thanks to the following persons for their kind collaboration in reviewing papers for *The Journal of Steroid Biochemistry & Molecular Biology:*

E. Barrie, London, England; **J. Bodwell**, Dartmouth, U.S.A.; **A. O. Brinkmann**, Rotterdam, The Netherlands; **N. Bruchovsky**, Vancouver (B.C.), Canada; **A. Capponi**, Geneva, Switzerland; **R.
